

COONARA GAS FIRES

POWER FLUE GAS FIRES

Up to 5.0 star energy rating

COVER: COONARA HERMITAGE FREESTANDING GAS HEATER

The Hermitage has been the flagship of the Coonara Gas Range for over 20 years. It's compact in size but big on performance.

The Warmest Aussie Legend

We have been proudly manufacturing in Australia for over 45 years.

Woodheaters have been the key to our business growth since the mid 1980's. Over the years our manufacturing of Woodheaters has employed hundreds of locals and contributed significantly to the local community - this is something we are extremely proud of. The acquisition of the Coonara brand in 2001 was made possible due to our earlier success in our contract manufacturing of Woodheaters and we are really excited about the newly introduced technologies that deliver Coonara Gas Heaters with high efficiency heating. This is a major step in the right direction for our environment.

Of course none of our success could be achieved without the support and dedication of our fantastic staff. We are a proud Australian manufacturer and we are proving that locally manufactured products can successfully compete with imported products. Your support is critical in helping keep the Australian manufacturing industry safe. We thank you for your continued support of Australian made Coonara Gas Heaters. They really are an Aussie icon.

Yours sincerely

Eric Woodgate
Managing Director

MYSTIQUE CONSOLE

REAR FLUE OPTION

The New Mystique Console is Compact in size, but big on performance. Its stylish & modern look will enhance any living area. This heater is cost effective to run while heating an area up to 14 squares*.

CHATEAU

The Coonara Chateau is a versatile heater ideal for both brick fireplaces or created fireplaces. It comes standard with switches on the top right hand side of the fascia, no bending required or you can get the optional thermostat for ease of use to suit your comfort levels.

FEATURES

- 83% Efficiency rating
- 4.6 Star energy rating
- Heats up to 14 squares*
- 7 Colour options
- Flueing options
- Optional thermostat controller
- Natural Gas/LPG
- Heat Output:
 - 33MJH on high
 - 23MJH on low
 - High ~ 7.6kw
 - Low ~ 5.2kw
- Zero Clearance

Inbuilt Chateau installed into stud wall cavity with internal fascia surround. (Internal Installation - Inbuilt)

External weather cover with cowl for Chateau installed through the wall (External Installation - Inbuilt)

Flue cowl attached to external wall with Chateau installed into stud wall cavity

THE PRACTICAL AND VERSATILE CHATEAU INBUILT GAS HEATER

The Coonara Chateau Inbuilt Gas Heater is an extremely practical and versatile gas log heater with multiple installation options for just about every situation.

Importantly, there is no need for an additional 'Zero Clearance Box' for heat protection of combustible walls.

The high efficiency (4 star plus rating) of the Chateau produces low surface temperatures eliminating the need for any additional heat shielding to combustible walls. Minimum clearances are only 12mm from the side and rear walls and 20mm from the top horizontal surface. These clearances are from the firebox casing NOT the heater fascia.

The Chateau can be installed into an existing fireplace or a purpose built timber surround with a vertical flue. It is also available with a horizontal flue outlet which provides for further installation options such as cutting out the plaster and stud wall to accommodate part of the firebox and using the internal console cover with the flue cowl attached to the outside wall. You can also install the Chateau completely through the wall and use the external weather cover. Both options, illustrated at right, significantly reduce the amount of floor space required.

HERMITAGE, MYSTIQUE & CHATEAU SERIES

Coonara Warranty

All current Coonara gas heaters are warranted to be free from defects in material and workmanship under normal use and service. The warranty of the actual firebox and heat exchanger is 5 years – to the initial purchaser.

All other components (except accidental breakage of door glass) are warranted for a period of 24 months. Coonara gas fires are designed and tested for use with Coonara manufactured flue kits.

The warranty contains benefits in addition to all other specific legal rights and remedies which the purchaser may have under statute. Refer to operating and installation instructions for full warranty statement.

Fuel Requirements

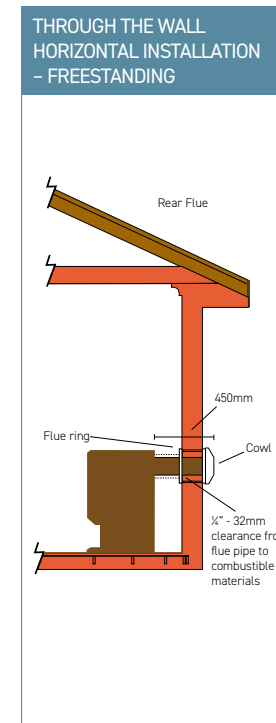

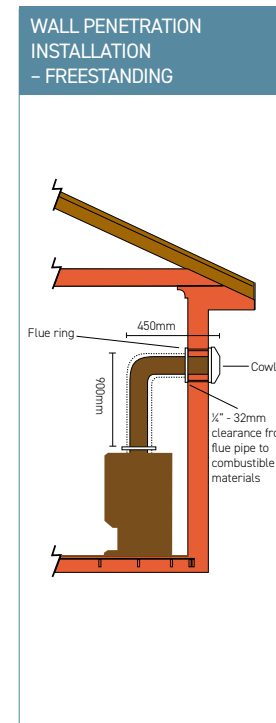

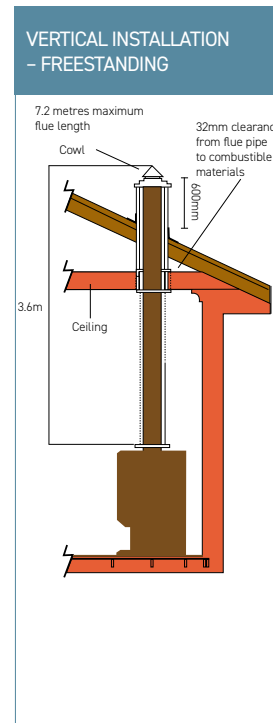

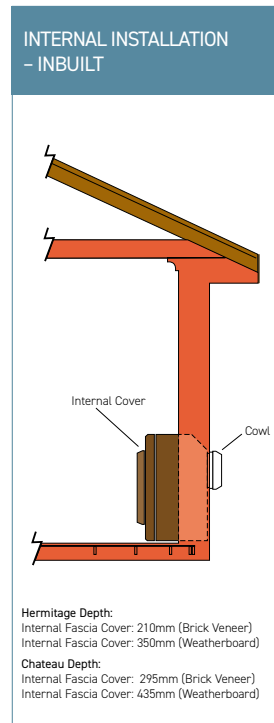

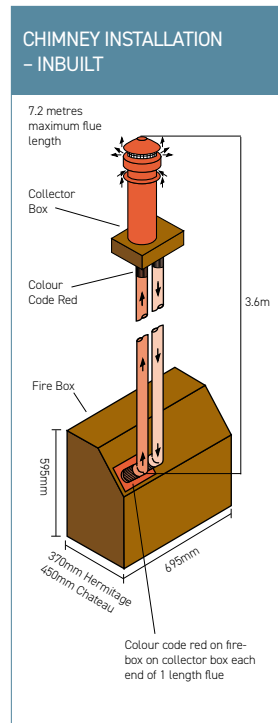

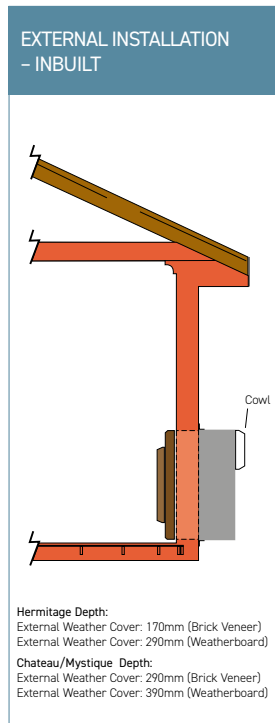

Designed for use with Natural and LPG Gas.

Tested and Approved

Tested and approved to the most stringent quality standards for safety and efficiency. AGA approved. Certificate No. 6165G.

Internal Fascia Cover Sizes:

Chateau = 740W x 680H Mystique = 786W x 679H Hermitage = 857W x 714H
