REGENCY FG39

Direct Vent Gas Freestanding

FG39 shown with optional brushed nickel louvres (shown without mandatory dress guard).

This Regency gas log fire features the finest, most realistic flame picture available. Enjoy the exceptional view through the wide one piece glass door designed to showcase the glowing flames and embers. With room sealed direct vent technology, you can vent up and out of your home saving money on complicated installations.

DIRECT VENT TECHNOLOGY

Direct vent technology means that you can install a Regency fire almost anywhere in your home - no chimney needed. From the top of the unit, simply vent your fire through the roof or an exterior wall. Direct vent means that you have sealed combustion – outside air is brought in through the vent for combustion and the combusted air is sent back out – your indoor air is not affected.

GAS ENERGY RATING

when installed with NG or LPG
